ClearPath™ Services Suite

Pitney Bowes has filled a market gap by creating a new hybrid shipping product. We've optimized our parcel network and combined it with our API driven technology. That means lowest possible shipping costs with robust, carrier level features and functionality.

Why Pitney Bowes?

Because we've solved it. We've combined SaaS Ecommerce technology with our international delivery network. It's a market-leading solution, from the company with years of Ecommerce shipping experience.

We pioneered Ecommerce shipping technology in the dot-com era. We're experts in running an international postal network. And we've invested millions to bring together our end-to-end global shipping solution.

As one of the most trusted names in Global Ecommerce, we offer the complete package for your parcels.

ClearPath™ Global Fulfillment

Ecommerce shipping products designed to meet the needs of your international customers.

How It Works

In your Order Management system, our API services stamp international orders with a unique order number and fill in our PB Global Hub address as the delivery address. You keep your existing shipping carriers and send a domestic shipment to our PB Global Hub. When the parcel arrives at our hub, we use the unique order number to acquire all the parcel information. From there, we take care of all customs documentation and international labeling and inject the parcel into our international parcel network.

Shipping Products For All Customer Types
